

Rapid Reticle RR-900-4

The newest addition to the Rapid Reticle family, the RR-900-4 was designed to military specifications for US Army snipers and infantrymen shooting both .223 Remington (5.56 NATO) and .308 Winchester (7.62 NATO) rifles.

With the patented Rapid Reticle ballistic reticle and integrated head and shoulders ranging system, military snipers and infantrymen can now acquire targets faster and accurately shoot without manual adjustments. The illumination extends the use of the scope in low light conditions and has been designed to work with night vision equipment. Field tested thoroughly by veteran snipers, this scope has been accepted as a standard through the US Army Force Modernization division where the RR-900-4 surpassed all expectations.

Noted as a force multiplier, the RR-900-4 has emerged as an exemplary necessity for both combat and commercial applications.

MRSP \$1,999.99

Model RR-900-4

Specifications:

- Nitrogen filled one piece 30mm diameter 6061 T6 aluminum tube with matte black anodized finish
- Shock, fog, and water proof multi-coated lenses
- 2.5-10 x 40mm with fast focus eye piece
- First focal plane reticle to allow for accurate shooting throughout power range without manual adjustment
- Positive ½ MOA windage and elevation clicks on the low profile target type knobs with zero stop wheel
- Illumination Power: 2032 3V lithium button battery
- Battery life: 9 days @ full power, 1 year if turned off when not in use
- Spare battery compartment in windage turret
- Weight (oz.): 23.63
- Length (inch): 13.5
- Eye Relief (mm): 97.00 @ 2.5x 92.00 @ 10x
- Eye Relief (inch): 3.82 @ 2.5x 3.62 @ 10x
- Field of View (feet@100 yds): 36.00 @ 2.5x 12.00 @ 10x
- Exit Pupil (mm): 13.00 @ 2.5x 3.89 @ 10x
- Temperature Operating Range: 71C to -20C

SPECIAL NOTE:

US Army Contract W91CRB-09-D-0074: Rapid Deployment Equipment Division – 3,000 units
